ACTIVE DEVICES

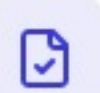

Comprehensive HR Management

Built for the unique complexities of large-scale contract labor and enterprise workforce operations.

Employee Lifecycle Management

Automate the journey from digital onboarding and background verification to shift assignments and final settlement. Reduce manual intervention by up to 80%.

Document & Compliance Tracking

A centralized digital locker for all statutory documents. Automatically track expiry dates for licenses, medical certificates, and police clearances with instant alerts.

Payroll & ERP Integration

Seamless bi-directional sync with SAP, Oracle, and Tally. Eliminate manual data entry and ensure that payroll is based on verified attendance data.

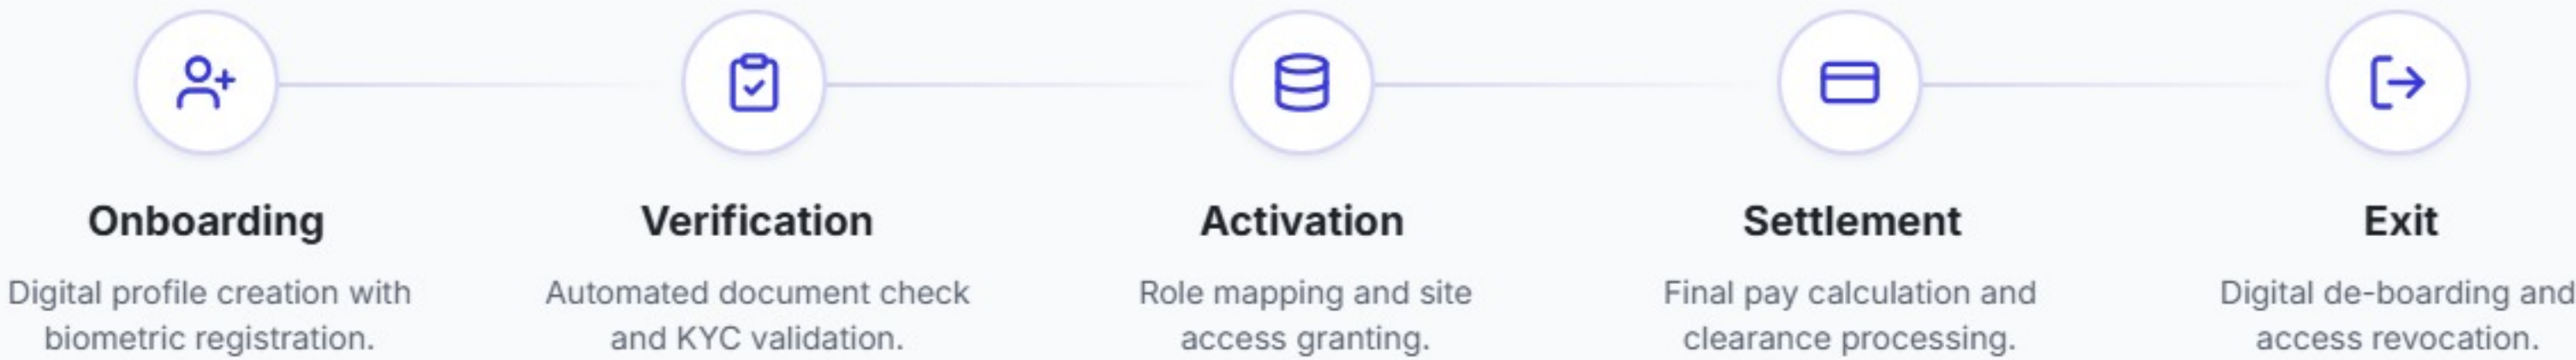

Role-Based Access Control

Enterprise-grade security that ensures data privacy. Define granular permissions for contractors, site managers, HR admins, and finance teams.

The Hire-to-Exit Workflow

A streamlined, automated process that ensures every worker is compliant before they step onto your site.

Fits Seamlessly into Your Existing Stack

InOps doesn't operate in a vacuum. Our HRIS platform acts as a bridge between your ground-level operations and your corporate enterprise resource planning (ERP) systems.

- RESTful APIs for custom platform connectivity
- Direct database connectors for legacy systems
- Automated CSV/Excel export for manual workflows
- Real-time webhooks for instant notifications
